# International Experience at Work for You

Gain the international experience you need in the world's new # 1 city for business

"It will change your life. You'll come back a new person." For years, the benefits of working, studying and/or training abroad has been described in these words. Everyone who has spent time abroad field believed it could greatly impact a person's life, and it does. Few other experiences in life have proven to net such a positive and sustainable impact.

Today's poor job market is hypercompetitive for undergraduates and young professionals (post Bachelor's degree) who wish to work abroad. There is not really a direct path of successfully gaining employment for most students.

## Internships are Pre-arranged

We do our very best to align you with a summer internship that fits your career goals before you leave the U.S. for Shanghai. While at internship placements, students will be working at various companies in Shanghai, including joint ventures, state-owned, companies, foreign-owned companies, and government offices, to name a few.

Students will work on independent projects, in teams, or on projects with their Chinese colleagues. While some internship positions are more demanding than others, students are encouraged to make the most of their experience.
